Points to note:

1. VAT is not charged on Registry fees, but is charged on our legal fees.
2. Fees quoted above cover the preparation of the documentation / dealing with formalities concerning the application of a European Design Registration. Additional costs may be incurred taking a design through to registration (known as the 'prosecution' of a design). The level of fees will depend on, for instance, any registry / third party objections. Where there are no major objections, our 'prosecution' fees (charged on a 'time spent basis') will be in the region of £50-100.
